

## PRODUCT OVERVIEW

BlueStep is the most comprehensive, web-based, technology solution available for assisted living care providers. We touch every aspect of the business from resident records to medication administration, to care charting, to marketing, to human resources to facility management, and beyond. BlueStep is committed to reducing liabilities, reducing staff workload, and increasing profitability. Our fully flexible platform empowers users to easily customize the solution to meet their needs. We call it, "Your Business. Your Way."

**BlueStep technology solutions are packaged in 3 products: iMAR™, iCARE™ and EDGE™.**

### iMAR™

BlueStep's revolutionary iMAR™ is true integration; connecting communities with physicians, pharmacies, families and other stakeholders of care and concern for the resident through dynamic automation.

### iCARE™

iCARE™ takes BlueStep to the next level by integrating medication administration with care systems for assessments, service plans, ADLs, vital signs, incident reports and more. iCARE™ offers a single login solution for all medication and care charting.

### EDGE™

BlueStep's EDGE™ stands alone in care community information management. This comprehensive platform combines all components of both iMAR™ and iCARE™, and extends it's offering to include marketing, HR/Staffing, facility maintenance, state survey, housekeeping, invoice and more. With EDGE™, every aspect of the system is fully customizable to meet your community's specific needs.

## Paper MAR ... eMAR ... now iMAR™ and beyond!

BlueStep's revolutionary iMAR™ is true integration; connecting communities with physicians, pharmacies, families and other stakeholders of care and concern for the resident through dynamic automation.

### Reduce Staff Workload

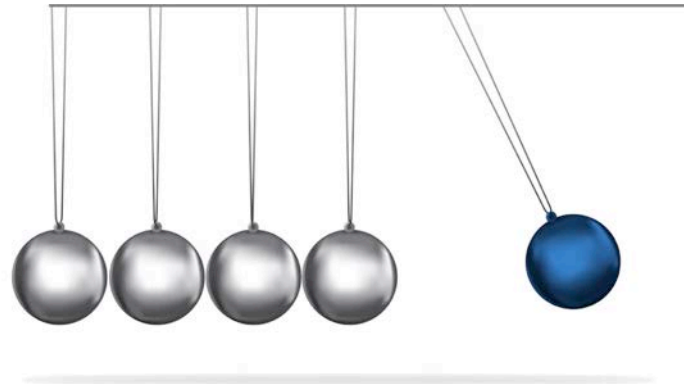

BlueStep goes beyond the traditional eMAR. Dynamic automation means simplification of routine and repetitive tasks. Enter a resident's information one time and their information is updated in every section for every user - in real time. If your staff knows how to check email, they can use BlueStep. In a few mouse clicks, staff can chart, add or discontinue medications instantly.

### Reduce Liabilities

Maintaining regulatory compliance is simple with BlueStep's Liability Monitor™. As staff work within the system, critical alerts and notifications are triggered when certain protocols or standards are not adhered to providing perfect documentation and peace of mind.

### Connect™ with others in the resident's circle of care

Not only does BlueStep's iMAR™ integrate with pharmacy software applications via HL7 standards, but BlueStep also allows pharmacies remote access to iMAR™ and resident demographics via BlueStep's PharmacyConnect™ online portal. In addition, families can access their own loved one's information and care details via BlueStep's secure FamilyConnect™ online portal.

### BlueStep's iMAR™ Core Features:

- Resident Information Management
- Medication Administration Record
- Pharmacy Software Integration
- Critical Alerts & Notifications
- Electronic Medication Re-Ordering
- Printable Forms
- Automated Offline Backups
- Real-time Data Updates
- State Survey Compliant
- Liability Monitor™
- FamilyConnect™
- PharmacyConnect™

## iCARE™ – Integrating care systems with medication administration records

Assisted Living providers need a comprehensive technology solution that integrates medication administration with care systems. iCARE™ includes assessments, service plans, ADLs, vital signs, incident reports, shift change reports and invoicing. In conjunction with BlueStep's iMAR™ solution, iCARE™ offers additional features tailored to reduce liabilities, reduce staff workload and increase long-term care providers' profitability.

### More Confidence with Less Liability

Peace of mind is needed as you operate in an increasingly litigious industry. At BlueStep we say, "Perfect documentation and charting is the only perfect defense." iCARE™ incorporates BlueStep's proprietary Liability Monitor™. This feature, dynamic reporting, auditing, and alerting, allows companies build custom parameters and monitor data. Staff members can receive on-screen, email or text message alerts when instances occur – thus keeping your community compliant with corporate and state regulations.

### More Care with Less Administration

iCARE™ uses a single login for both medication administration and care charting. In addition to care charting, staff can report incidents and make specific notes for each resident that is visible throughout the organization. This reduces redundancy – allowing staff members more time to provide quality care to residents.

### More Invoices with Less Error

Whether a point system, flat monthly fee or other initiative, iCARE's configurable assessments, service plans and ADLs, automatically create invoices based on client preferences for services. You set up the parameters, your staff charts, and iCARE creates the invoice. iCARE improves the accuracy of invoices and allows them to be sent as PDF documents to responsible parties.

### BlueStep's iCARE™ Core Features:

- All features of BlueStep's iMAR™

### PLUS

- Assessments
- Service Plans
- Activities of Daily Living (ADLs)
- Vital Signs
- Incident Reporting
- Shift Change Reporting
- Resident Notes

## EDGE™ - A completely customizable technology solution for care providers

BlueStep's EDGE™ stands alone in care community information management. This comprehensive platform combines all components of both iMAR™ and iCARE™, and extends its offering to include marketing, HR/Staffing, facility maintenance, state survey, housekeeping, invoice and more. With EDGE™, every aspect of the system is fully customizable to meet your community's specific needs.

### **Maintain an Optimal Census Beyond Marketing**

Untimely response or losing leads are a thing of the past with the EDGE™ Marketing module. Leads become the basis of the admission and ultimately the resident record without ever having to enter the information twice. And with BlueStep's Critical Alerts & Notifications, your communities Marketing Director can be notified via text message, on screen alert, or email the moment a new lead is entered. Custom reports on key information and statistics provide real-time tracking of current initiatives.

### **Manage Staffing Effortlessly For Future Decision Making**

Managing staff timecards, attendance and scheduling, certifications, daily activities, and in service trainings has never been easier than with the EDGE™ HR/Staffing module.

### **Keep All Care Providers Connected**

BlueStep's proprietary Connect™ technology securely allows your community to communicate with any party of care and concern for the resident. Create your own Connect™ sites to coordinate care and facilitate real-time communication with BlueStep's customizable Connect™ portals, Family Connect™, Pharmacy Connect™, PhysicianConnect™, HospitalConnect™, LabConnect™ and more! BlueStep users are changing the industry, one connection at a time.

### **BlueStep's EDGE™ Core Features:**

- All features of iMAR™
- All features of iCARE™

### **PLUS the following modules:**

- Marketing
- Human Resources/Staffing
- Facility Maintenance
- Survey
- PhysicianConnect™
- HospitalConnect™
- LabConnect™
